

PointClickCare Integration Overview

The GEHRIMED Integration with the PointClickCare EHR enables you to import patient records from PointClickCare to GEHRIMED. Once records have been imported, encounters for those patient records are automatically pushed to PointClickCare. Additionally, you may import medication and allergy information for linked patients.

To setup your PointClickCare integration, you will need to contact your GPM Client Services before performing the following setup.

Account Setup

Before you can set up you account in GEHRIMED, your organization must contact GPM support and have the integration enabled.

To perform account setup:

1. Login to your GEHRIMED Account and select the **Verify PointClickCare Credentials** option in the user menu:

2. Use your PointClickCare account credentials on the Partner Login window:

3. After successfully entering your credentials a message is displayed. GEHRIMED Client Support will perform the necessary database setup for your account:

- 4. GPM Support will connect your GEHRIMED Facilities to your PointClickCare Facilities, enabling you to access the Facility Feed and import patients.
- 5. If you have multiple credentials for different PointClickCare Organizations, repeat steps 1-4 until you have performed the initial verification of all accounts.

Verifying your PointClickCare Credentials

Once GPM Support has completed your account configuration, you will need to periodically verify your PointClickCare credentials to ensure access to the PointClickCare EHR information.

NOTE: Your credentials are valid for about a 15-day period after you validate them.

When your credentials are expired, you will receive a warning message when accessing PointClickCare functionality:

Scheduled Provis	der Census Facility Census	Facility Discharged	and the second sec						
			Facility Feed				Export Results	New Patient	Print
The Facility Feed da	ita may not be current. Update no	ow using your PointClickCare	login.						
The Facility Feed da	ita may not be current. Update no	ow using your PointClickCare	login.						
Locat	on (Unit/Room/Bed)	•	Patient	٥	Date of Birth	٠	Admit Da	ite	

Multiple Accounts

It is possible that you have more than one PointClickCare Login, to represent facilities that belong to different organizations. If your credentials for a Facility are not verified, your encounters will not push to PointClickCare.

You may view your active PointClickCare logins in the PoinClickCare User Info window.

PointClickCare User Info

Once you have verified your credentials in GEHRIMED you may access information about your PointClickCare Login(s) by accessing the **PointClickCare User Info** option in the user menu:

The PointClickCare User info window displays information about your account relevant to the function of the GEHRIMED/PointClickCare Integration:

PointClickCare Scopes

Scopes are the permissions associated with your PointClickCare account and configured by the PointClickCare Administrator in the facility's organization. The scopes necessary for using the GEHRIMED/PointClickCare Integration are listed under **GEHRIMED PointClickCare User Scopes.**

A green checkmark means your account has the necessary scope to utilize that function of the integration. A red 'X' indicates that you have not been assigned the scope by the PointClickCare Administrator.

Attempting to utilize a function of the integration without the appropriate scope will result in errors.

Accessing the Facility Feed

After the PointClickCare Integration is configured by GPM the *Facility Feed* tab will appear on the Patient Census window:

The Facility Feed displays all current patients in the PointClickCare Facility, and enables you to import patient records from PointClickCare to GEHRIMED.

NOTE: The Facility Feed will only display a maximum of 500 records.

Patients with a sicon have already been imported into GEHRIMED, and you may launch and encounter for the patients by selecting the icon, or launch the patient's GEHRIMED details by selecting their name link. Patients with a sicon have not yet been imported to GEHRIMED.

Importing Patients

You may import patient record information from PointClickCare to GEHRIMED using the Facility Feed. Importing a patient will bring the Demographic and Insurance information for that into GEHRIMED, and enable the pushing of encounters to PointClickCare.

Import a Patient

1. To import a patient, click the icon. Available patient demographic information and insurance information is displayed:

atient Details

.			

When a new patient is created in GEHRIMED by importing the patient's available demographics and 3 most recent insurance records will be saved.

	Patient Facility Insurance Visited By Last Visited Next Visit Birth Sex Contact By Status	RESIDENT, EXAMPLE AUGUSTUS HEALT Unknown <u>No visit scheduled</u> F Active	E	DOB Room/Floor Language Ethnicity Race Age Patient ID ffective Date	01/25/1924 18 (C60E7382-) 96 2234238 03/09/2020	FF Problem List	Medications	Allergies 🔻	X
Select smoking	•	GEHRIMED Facesheet	-	Edit Patient	Emergency Conta	ct			

Patients imported from the Facility Feed will have the letter "FF" on their patient details card:

Merging Patients

When merging imported patient information, either at the time of import or later using the Merge feature in GEHRIMED, Patient demographic information (name, DOB, etc.) imported from the PatientDirectory will not override the information in existing patient record, even if the fields are empty.

Imported Information

The following information is imported from the facility to GEHRIMED when linking a patient record:

Patient Demographics

t Patient				
ent Details				
First Name	Angelyn	Address	708 Garrah Lane	
Aiddle Name		Address 2		
Last Name	Aguilar	City	Dade City	
Prefix		State	FL	
Suffix		Zip Code	33525	
Date of Birth	4/21/1923 12:00:00 AM	Home Phone	352-555-4601	
Sex	F	Mobile Phone		

All Patient Demographic information is displayed and will be imported. This information includes name, date of birth, etc.

Patient Insurance

Company Name	\$ Group Number	\$ Effective Date	\$ Expires Date	¢
FL MCD MNG-Molina Healthcare		01/01/2016	Unknown	
Medicare B		01/01/2016	Unknown	
X-over Medicare B to Medicaid		Unknown	Unknown	
Resident Liability		Unknown	Unknown	

Although all patient insurance information associated with a patient will be displayed on the import screen, only the three most recent records are imported to GEHRIMED.

Encounters

Encounters completed in GEHRIMED for a patient imported from PointClickCare are pushed to the PointClickCare patient records (see <u>The Encounter in PointClickCare</u>). Additionally, you may import some data from PointClickCare to the GEHRIMED encounter.

Medications & Allergies

Active Medication and Allergy information in PointClickCare may be imported to a GEHRIMED Encounter to ensure that the most update to date patient information from the facility is included in the encounter note.

Medication and allergy information is imported to GEHRIMED as unstructured text data included in the Signed encounter note.

Medications

To import medications from PointClickCare

1. Launch an encounter for a patient:

Signing the Encounter

When you sign an encounter note in GEHRIMED for a patient imported from PointClickCare, the note is queued to push to PointClickCare.

NOTE: The queue for pushed encounters is emptied approximately every five minutes.

NOTE: If your PointClickCare credentials are not verified, you will receive a warning after signature that the encounter will not be queued.

Delivery Details

Once the encounter has been signed you can view the status of the encounter delivery to PointClickCare on the Encounter Details (you may also view the delivery status on the <u>View PointClickCare Sent</u> <u>Encounters</u> window).

On a signed encounter that has been sent to PointClickCare, select the 'PointClickCare' tab to view the delivery status:

The GEHRIMED Encounter in PointClickCare

When an encounter note is signed in GEHRIMED for an imported patient, the content of the note is made available in PointClickCare under the **External Encounter Notes** section:

PointC	lickCare	(API sandbox) FACILITY_12	- devtestui -	Sign Off

NOTE: The record uploaded to PCC is *not* the Signed Encounter Note. It is a copy and includes the text: *"This is a copy of the signed encounter note documented in GEHRIMED."*

Too Large Encounters

PointClickCare has a 60,0000 character limit on encounters that may be successfully pushed to PointClickCare via the integration.

GEHRIMED will perform an estimate when you sign your encounter, and you will receive a warning if the encounter is close to the 60,000 character limit. The encounter will still be queued to push however, you will need to check the encounter status either in the details or the View PointClickCare Sent Encounters window

NOTE: You can reduce the character count for encounters that include information copied from outside of GEHRIMED by selecting the **Clear Formatting** button after pasting.

Deleting Encounters

When a signed encounter is deleted in GEHRIMED (an encounter can only be deleted by request of GPM Client Services) no update is made in PointClickCare. It is recommended that you include an Addendum before deleting an encounter.

Pushing Historical Encounters

If you have merged an existing GEHRIMED Patient with a Patient Record from the Facility Feed, you may upload any encounters created in GEHRIMED prior to the merge by selecting **Send to PCC** in the encounter's option menu:

	Patient: <u>ABERNATHY, SAMMIE</u> Facility: EXAMPLE FACILITY - 22 DOS: 06/02/2020	DOB: 02/09/1947 (73 yrs) Encounter ID: 3078938 Visit: 06/02/2020: Example Physic	Insurance: FL MCD MNG-SUNSHI Template: Annual Wellness Visit ian (1-Month)	NE STATE Options O O State Change Criteria
	Resend Download Print	Quality Measures 🔥 Clin	nical Summary 🔻	Correct Formatting
Document	Delivery PointClickCare			Send to PCC
Total Sent:	2			Send Copy To
				Resend Billing
T	A And A A A A	To IF A Se Da	A sin that we had not	A A Strate A A

The encounter will queue and send in the same manner as an encounter created for a PointClickCare linked patient.

View PointClickCare Sent Encounters

In the options menu on the GEHRIMED dashboard you may access the "View PointClickCare Sent Encounters" window to view all your encounters that have been queued to push to PointClickCare:
